Chemical Deployment listed below with hyperlinks to product website, SDS & Testimonials.
There is NO NEED for wipe down – which eliminates the risk of cross contamination!

VitalOxide
Exceptional Performance, Easy to Use

ONE PRODUCT, SEVEN SOLUTIONS!

Vital Oxide is an EPA registered hospital disinfectant cleaner, mold killer and super effective odour eliminator. Ready to use with no mixing required, just spray, wipe or fog right from the bottle. Non-irritating to the skin and non-corrosive to treated articles.

1 **EPA Registered Hospital Disinfectant**
Proven to kill a wide range of viruses and bacteria Vital Oxide won't contribute to the formation of mutating "super bugs", and does not contain volatile organic compounds (VOCs).

Please note: Paul Davis Staff will be outfitted in Full Personal Protective Equipment (PPE) during their service. Our technique is safe on electronics, high touch equipment and food contact surfaces. Most Comprehensive Surface Coverage available today! Please [CLICK HERE](#) to watch a brief video of why this system is far superior to manual treatments!

Paul Davis Decon Teams provide a state of the art “Touchless Disinfection Service”.

We are trained and experienced in the delivery of hospital grade, EPA approved solutions that have qualified for use against SARS-CoV-2, the novel coronavirus that causes COVID-19. Our technicians will be following strict protocols and following all manufacturers’ instructions for use and strict PPE guidelines.

We utilize innovative electrostatic spray technology that allows disinfecting and sanitizing solutions to reach surfaces outside the line of sight, covering what conventional trigger sprays miss, including the sides, underside and backside of surfaces. Because the particles are electrostatically charged, they are attracted to surfaces with a force stronger than gravity, allowing the solution to reach and uniformly coat even hard-to-reach surfaces. Because these charged particles are literally "attracted to surfaces", they clear the air much faster than other delivery systems like foggers, which leave the air saturated until gravitationally or forcibly cleared, allowing occupants our customers to safely reenter a room much sooner.

Our chosen solutions, delivered electrostatically are non-bleach-based formulas which are specifically designed for broad surface compatibility. They are safe on hard and soft surfaces as well as electronic equipment - and require NO WIPE DOWN and leave NO RESIDUE - which eliminates the threat of cross contamination caused by more manual methodologies.

Please access our website [HERE](#) to learn more about the broad range of services we can provide you in your time of need.
